South Wales Analysis and Probability Seminar

Swansea University
14 December 2018

Carlo Mercuri (Swansea)

10:30–11:05

Quantitative symmetry breaking of groundstates for a class of weighted Emden-Fowler equations

Baptiste Morisse (Cardiff)

11:10–11:45

The onset of instabilities for non hyperbolic systems

Andrew Neate (Swansea)

13:15–13:50

Semiclassical diffusions

Junyong Zhang (Cardiff)

13:55–14:30

Strichartz estimate and Schrödinger operator in a conic singular space

Biomath Colloquium

15:00–16:00

Chandrasekhar Venkataraman (Sussex)

Multiscale modelling of biological problems

https://jbenartzi.github.io/SWAP/

Organisers:

Jonathan Ben-Artzi (Cardiff)
Dmitri Finkelshtein (Swansea)
